FOREWORD

This is the 1990 edition of the Ministry of Forests' *Major Timber Processing Facilities in British Columbia* and refers to operating timber processing facilities in the province which during 1990, used logs as their main source of wood raw material. Coverage of the industry does not, generally speaking, include re-manufacturing plants. Pulp and paper mills are the main exceptions.

Information regarding the timber processing facilities are from Ministry survey forms submitted by mills to Ministry of Forests' regional and district staff. Not all mills responded to the survey. Other sources of information include trade publications, directories and corporate annual reports. The cooperation of mill personnel who responded to the survey is gratefully acknowledged. A copy of this report is sent to the mills listed in this report.

Where a mill produces more than one product (e.g. lumber and plywood; lumber and paper), it will be listed in the respective sections of the report.

This report is updated annually and is available, upon request, to the general public. Any errors or omissions in this report should be communicated to:

CHIP MILLS

(Listed Alphabetically)

Only chip mills producing wood chips as a primary product for pulping are listed in this report. All operating mills are listed:

1. Measurement units are bone dry units (BDU's);

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity is based on 480 shifts per year.

VENEER, PLYWOOD AND PANEL MILLS

(Listed Alphabetically)

All operating veneer and plywood mills which have primary log processing capability are listed in this report. For mills producing market veneer and plywood, veneer capacity includes both market veneer and the veneer which is used in plywood manufacture. Some panel mills which use wood residuals or which do not have primary log processing capability are also listed.

1. Measurement units are in square feet, 3/8" basis;

2. Per shift capacity is based on a continuous 8-hour work period;

3. Annual capacity for veneer mills is based on 480 shifts; for plywood mills and other panel mills, 720 shifts.
